there is a pct

PCT/JP00/06572

A computer-implemented electronic bid method by a service provider, comprising:
registering, through a network, a user as a buyer and merchandise/service that the buyer wants to buy in a first database;
registering, through the network, a user as a seller and merchandise items/services that the seller is offering to sell in a second database;
categorizing merchandise items/services of the first database into groups and searching the number of potential buyers who want to buy merchandise items/services in at least a group being categorized from the first database;
selecting sellers who are offering to sell merchandise items/services in the same group from the second database and providing a potential buyer information including the number
